# INTRODUCTION

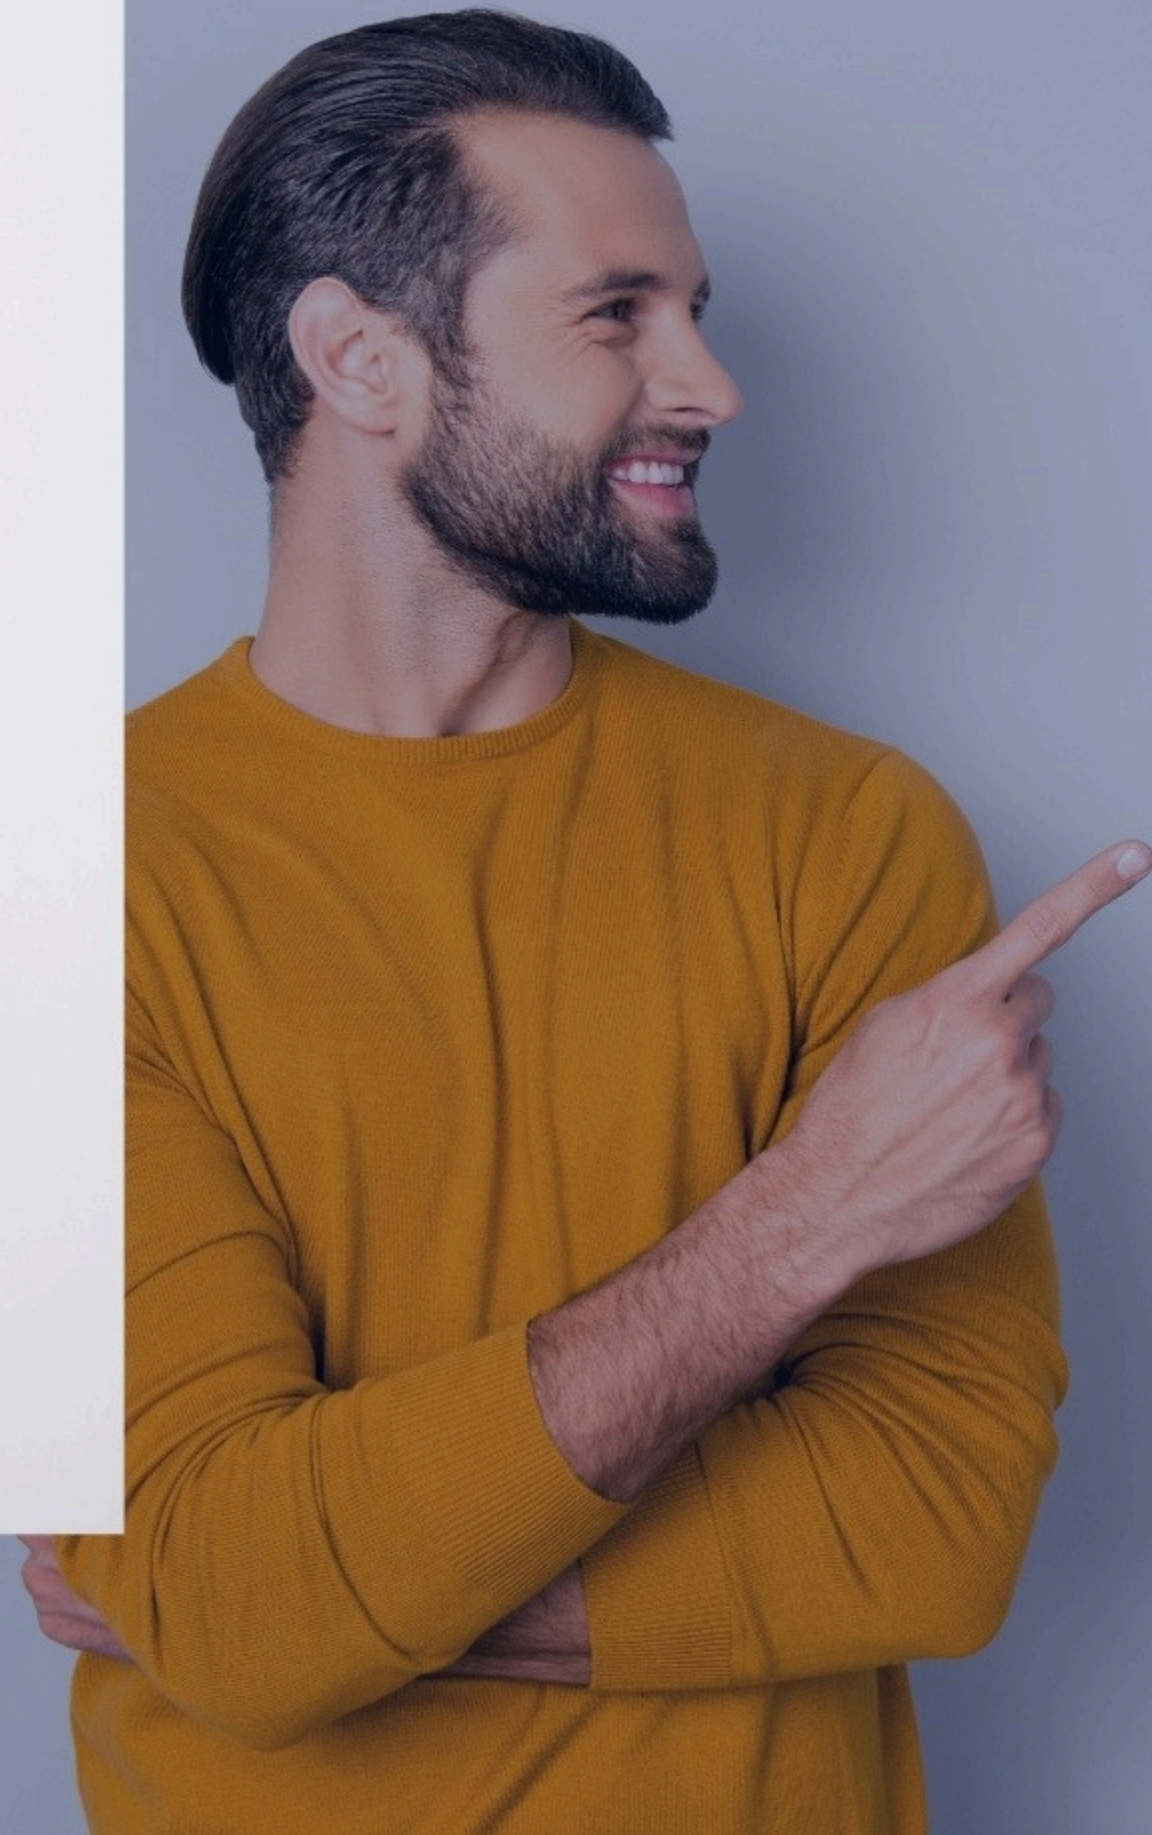

JungleWeb presents itself as a digital marketing + web/app development agency offering SEO, PPC/Google Ads, social media marketing, email marketing and more. The site positions the company as a leading digital marketing firm in Delhi-NCR.

What this implies: The mix of services suggests a “full-funnel” approach (website/app build → traffic acquisition → reputation management), which is typical for agencies aiming to be a one-stop growth partner.

# ABOUT US

- The public pages emphasize breadth (digital + dev), suggesting the team covers strategy, execution, and ongoing optimization rather than only one channel.
- Copy across pages is largely practical/benefit-oriented rather than culture-heavy (few bios/case studies shown), so buyers should expect capability-focused proposals over story-driven branding.

# MISSION & VISION

## MISSION

Our mission is to help businesses across the world thrive online by providing powerful, innovative, and affordable digital marketing solutions.

## VISION

The site's consistent emphasis on packaged digital services and end-to-end delivery implies a 360° growth-partner vision: turn ideas into results via websites/apps plus paid & organic acquisition.

# CORE VALUES . . . . .

- Outcome/ROI focus: repeated mention of performance channels (SEO, PPC, SMM) and “marketing solution” framing.
- Customization & completeness: complete marketing solution + service breadth suggests they tailor mixes by client.
- Responsiveness & support: footer/contact details are prominent across service pages, implying service accessibility.
